

Solution Overview

Leading enterprise file sharing and collaboration solution and mobile content platform for today's mobile workforce

kiteworks by Accellion is the definitive mobile content platform for securely sharing files, developing content-rich enterprise apps, and increasing mobile productivity, while ensuring enterprise-grade IT security and compliance.

Secure Mobile Content Platform

The kiteworks Mobile Content Platform offers enterprise organizations a secure file sharing and collaboration solution that enables secure internal and external sharing of enterprise information and a development platform for designing and deploying custom enterprise mobile apps to increase productivity while ensuring data security and compliance. The kiteworks enterprise-grade mobile SDKs and Enterprise APIs enable rapid development of business applications that leverage out-of-the-box features for securely accessing, editing, and sharing enterprise content on any type of device.

Key features of the kiteworks platform include:

- Enterprise-grade secure file sharing and collaboration capabilities.
- Secure access to enterprise and cloud content sources – without requiring a VPN.
- Integration with existing enterprise systems including AD/LDAP, DLP, SSO, MDM, and SFTP.
- Secure mobile container with integrated editor, encryption and remote wipe.
- Mobile SDKs for iOS, Android, and Google Glass.
- Enterprise APIs to extend existing enterprise infrastructure to mobile.
- Comprehensive file tracking and reporting for IT management and control and compliance.

Secure Universal Access to Enterprise Content

The kiteworks platform enables secure mobile access and sharing of enterprise content, without requiring a VPN. With kiteworks, users get a single universal point of access for working with enterprise content regardless of where it resides. Popular content sources supported include:

- Home Drives
- Windows File Shares (CIFS and DFS)
- Microsoft® SharePoint 2007, 2010, 2013)
- Documentum 6.6, 6.7 and 7
- OpenText Content Server 10 and Livelink 9.7.1
- Microsoft SharePoint Online
- Google Drive for Work
- Microsoft OneDrive for Business
- Box
- Dropbox

Key Benefits

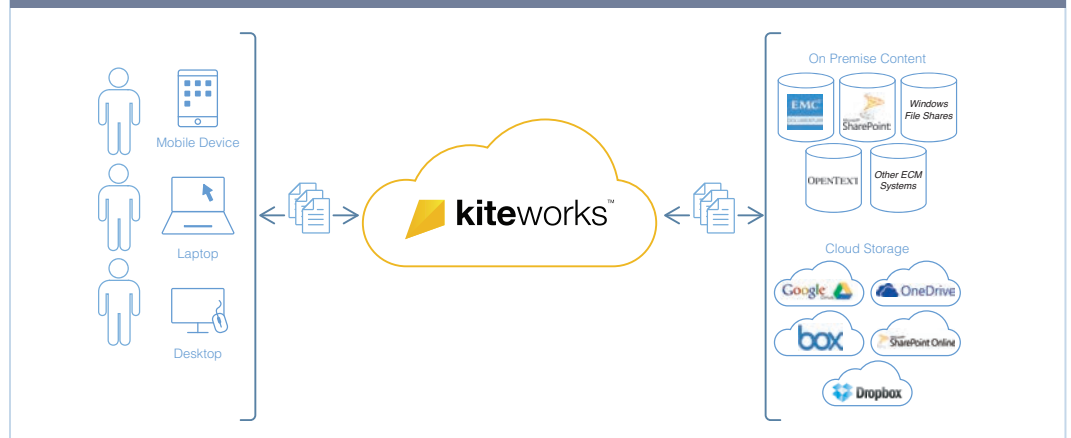

- Increase mobile productivity while ensuring data security
- Provide secure mobile access to enterprise content
- Enable rapid design of new mobile workflows and secure mobile apps
- Manage and audit all file and folder activity
- Ensure data sovereignty
- Demonstrate compliance with SOX, HIPAA, GLBA
- Enable secure cross-organizational collaboration

Key Features

- Online file sharing and collaboration
- Secure mobile apps for iOS and Android
- Mobile SDKs for rapid development
- Secure container for out-of-the box security and mobile productivity
- REST APIs for deep integration and customization
- Integrated mobile editor
- Private cloud multi-tier architecture
- Admin dashboards and reports
- Authentication via LDAP, 2FA
- Single sign-on via SAML
- Support for S3 and Atmos storage
- MDM integration
- Integrated Antivirus
- DLP integration
- SFTP integration
- User friendly DRM
- Online Viewer
- Custom branding

Secure Mobile File Sharing and Collaboration

Users can link content from multiple content stores in a single kiteworks folder, which can then be shared securely with external users. Documents of record are always maintained in the source system, along with a complete audit trail.

Private Cloud Enterprise-Grade Architecture

The kiteworks platform was designed from the ground up for enterprise scalability, security, and agility.

Private cloud – The kiteworks architecture offers dedicated and isolated cloud infrastructure enabling enterprises to keep servers, storage, application services, meta-data, and authentication all within the organization's firewall. Deployment options include:

- Private Cloud On-Premise
- Private Cloud Hosted
- Hybrid - Combination of on-premise and hosted private clouds.

Multi-tier architecture - kiteworks enables extreme deployment flexibility by allowing the web, application, and storage tiers to be separated and placed anywhere in the network. Each tier can be scaled independently or all can be combined into a single virtual appliance.

Data sovereignty and global deployments – kiteworks enables enterprise organizations to enforce data residency policies by restraining data storage to physical geographical boundaries to meet security and compliance requirements.

Mobile Enablement and Productivity

The kiteworks mobile apps and mobile SDKs for iOS and Android devices enable users to securely create, access, and collaborate on enterprise content wherever work takes them. With kiteworks, organizations can enable new mobile workflows and mobile apps to enhance productivity and enable employees to work securely from wherever.

- Secure mobile access to enterprise content stored in HomeDrives, Windows File Shares, ECMs and Cloud Storage
- Securely create and edit Microsoft Office files both online and offline within a secure mobile container
- Move and combine content across enterprise content sources via the Move Tray
- Quickly find content using full content search with advanced metadata filters

- View the latest file activity via a real-time Activity Stream
- Manage project workflows with lock/unlock and task management
- Protect enterprise content on mobile devices with remote wipe, pin code, and app whitelisting
- MDM integration with MobileIron, Good Technology, and Symantec

Secure File Sharing

The kiteworks solution helps enhance employee productivity by enabling users to easily collaborate with internal and external stakeholders and share content securely. The solution facilitates real-time collaboration via innovative features including:

- Activity stream
- Move tray
- Task management
- File synchronization
- File locking
- Secure file sharing
- Comments
- Online Viewer

IT Admin and Security Controls

The kiteworks admin console provides interactive dashboards and system alerts that deliver critical system information at a glance. Dashboards deliver:

- Status of system services
- Licenses consumed / remaining
- Storage allocation
- Snapshot of activities taking place on the system
- System health alerts

Key security and administrative features include:

- File tracking & reporting
- Anti-Virus
- LDAP/AD, SSO
- Encryption key ownership
- Data Loss Prevention
- User friendly DRM - watermarking, view only, and file withdraw
- Two Factor Authentication
- Remote wipe
- App whitelisting
- Offline PIN
- Restricted admin
- Online Viewer

About Accellion

Accellion, Inc. is an award-winning private company that provides mobile solutions to enterprise organizations to enable increased business productivity while ensuring security and compliance. As the leading provider of private cloud solutions for secure mobile file sharing and collaboration, Accellion offers enterprise organizations the scalability, flexibility, control and security to enable a mobile workforce with the tools they need to create, access and share information securely, wherever work takes them. More than 12 million users and 2,000 of the world's leading corporations and government agencies including Procter & Gamble; Indiana University Health; Kaiser Permanente; Lovells; Bridgestone; Harvard University; Guinness World Records; US Securities and Exchange Commission; and NASA use Accellion solutions to increase business productivity, protect intellectual property, ensure compliance and reduce IT costs.
