

Mobile App

Secure mobile access, creation, editing and sharing of enterprise content.

Key Benefits

- Deliver secure mobile productivity for the enterprise
- Leverage and extend existing ECM systems by providing mobile access
- Provide secure access to cloud content stores for enterprise security and compliance
- Provide a unified mobile view across all content sources
- Delight end-users, improve adoption and satisfaction
- Secure mobile access, creation, editing, and sharing of enterprise content
- Collaborate with colleagues on enterprise content
- Full administrative control and audit capabilities

Key Features

- Native mobile apps for iOS and Android
- Secure mobile container
- Create and edit MS Word, Excel, PowerPoint documents
- Annotate PDF documents
- Move Tray
- Mobile access to enterprise and cloud content
- Full content search
- Two-factor authentication
- Remote wipe
- Whitelisting of third party apps
- User friendly DRM with watermarking, view only, and file withdraw capabilities
- Online Viewer

The kiteworks mobile app sets a new bar for mobile productivity with its powerful, elegant, and intuitive user interface that empowers mobile users to seamlessly and securely access, share, and manage content across devices.

Mobile First Design

With a mobile-first icon-based design, the kiteworks solution is optimized for tablets and smartphones. An intuitive interface enables users to view, download, edit, save, upload, and share files via a secure private cloud.

- Drag and drop to easily move, copy, or share multiple files using the innovative Move Tray
- Collaborate in real time using an activity stream optimized for mobile screens
- Experience an intuitive, powerful, and elegant user interface

Secure Mobile Productivity

The mobile productivity tools integrated within kiteworks allow users to edit content on the go without having to move the data outside of the kiteworks secure mobile container.

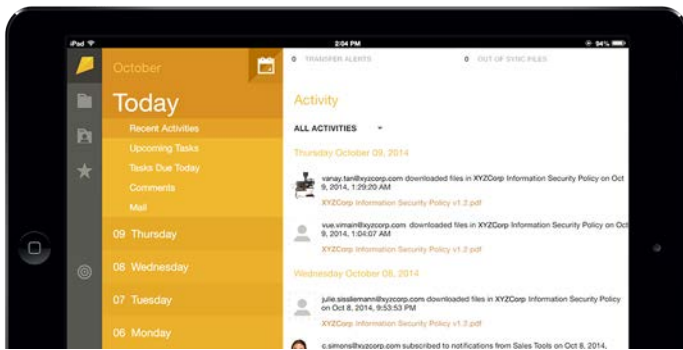

- Securely create and edit Microsoft® Office documents including Word, Excel, and PowerPoint
- Annotate PDFs using embedded annotation tools
- Access folders and files stored in secure kiteworks folders, Enterprise Content Management (ECM) systems, and those saved locally to the device
- Securely preview over 200 types of files without having to download them
- Download files and save locally on the mobile device, in a secure encrypted container
- Upload e-mail attachments, pictures from the camera or camera roll, and files from other apps to secure kiteworks folders
- Quickly find and access content using full content search with advanced metadata filters

Mobile Collaboration

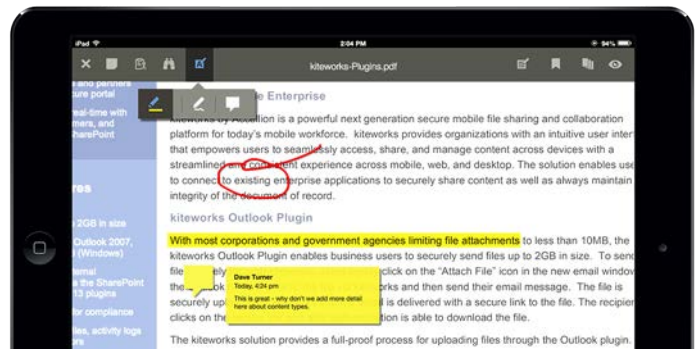

Using the kiteworks mobile app, users can collaborate with internal and external teams. The kiteworks activity based user interface is designed for real time collaboration among teams.

- Share file links securely with multiple internal and external recipients
- Collaborate in real-time with colleagues and other stakeholders by posting and replying to comments on files
- Move files between enterprise content sources using the innovative kiteworks Move Tray
- Manage access to kiteworks files by assigning roles to users as Manager, Collaborator, Viewer, or Downloader
- Assign tasks to collaborators in a shared folder
- View real-time activities including file and folder activities, user comments, and assigned tasks
- Lock/unlock files to control the editing of files in secure kiteworks folders and SharePoint

Intuitive User Experience with Mobile-First Design

kiteworks Activity Stream

kiteworks Built-In Mobile Editor

Universal Access to Enterprise and Cloud Content

The kiteworks mobile app provides secure, real-time mobile access to ECM and cloud content stores. Since files are not duplicated, kiteworks honors the enterprise access controls already in place and reduces the risk of exposing sensitive documents outside of the kiteworks secure container.

- Access files stored in SharePoint, SharePoint Online, Windows File Shares, DFS, Documentum, OpenText, Google Drive for Work, Microsoft OneDrive for Business, Box, and Dropbox.

Mobile Content Platform

The kiteworks Mobile App is built on the kiteworks Content Platform. Corporate developers can rapidly develop custom mobile applications using the platform.

- Rapidly design secure mobile applications using the kiteworks platform, mobile SDKs and enterprise APIs.

Strong App Security with 256-bit Encryption

The kiteworks mobile app supports strong authentication and encryption standards to safeguard enterprise content.

- Encrypts files at rest with 256-bit AES encryption; data in motion is also encrypted utilizing SSL for file uploads/downloads

- Configurable PIN settings with full administrative control for accessing files on mobile devices
- Authentication through enterprise LDAP and two-factor authentication to ensure only authorized users gain access to secure folders
- User friendly DRM to secure and control content with watermarking, view only, and file withdraw capabilities

Admin Controls

Designed for enterprises, kiteworks provides full IT management and administrative controls to secure a mobile workforce.

- Remote wipe content stored in the kiteworks mobile app secure container, when a device is lost or stolen
- Whitelist applications that are allowed to open files from within kiteworks
- Customize user View or Edit mode based on security policy
- Access kiteworks file and folder activity logs for a full audit trail to demonstrate compliance with government and industry regulations including HIPAA, GLBA, and SOX.

About Accellion

Accellion, Inc. is an award-winning private company that provides mobile solutions to enterprise organizations to enable increased business productivity while ensuring security and compliance. As the leading provider of private cloud solutions for secure mobile file sharing and collaboration, Accellion offers enterprise organizations the scalability, flexibility, control and security to enable a mobile workforce with the tools they need to create, access and share information securely, wherever work takes them. More than 12 million users and 2,000 of the world's leading corporations and government agencies including Procter & Gamble; Indiana University Health; Kaiser Permanente; Lovells; Bridgestone; Harvard University; Guinness World Records; US Securities and Exchange Commission; and NASA use Accellion solutions to increase business productivity, protect intellectual property, ensure compliance and reduce IT costs.
